SUMMARY

Software Engineer with 4 years of experience building enterprise-scale products across the full stack. Currently on the R&D MDM Informatica team at Salesforce, owning critical epics and refactors end-to-end. AI-first engineer — orchestrating coding agents (Cursor, Anthropic Claude) to plan, build, test, and review in parallel, while championing shift-left quality, automation, and zero-regression releases.

WORK EXPERIENCE

Associate Member of Technical Staff — [Salesforce](#), Bengaluru

Mar 2026 – Present

- Full-stack engineer on the R&D MDM Informatica team, building enterprise-scale master data management (Informatica joined Salesforce via acquisition).
- Own and deliver critical epics and refactors end-to-end across backend services, BFF layers, and complex UI workflows — APIs, configuration & metadata flows, UI integrations, automation, and production stability.
- Work AI-first: orchestrate coding agents (Cursor, Anthropic Claude) to plan, build, test, and review in parallel, shipping large and complex work faster without trading away quality.
- Trusted for complex cross-layer debugging and time-sensitive blockers, stepping in to unblock releases and ensure continuity.
- Champion shift-left quality and automation (unit, end-to-end, and visual testing) for correctness, maintainability, and zero-regression releases.

Software Engineer — [Informatica](#), Bengaluru

Aug 2022 – Mar 2026

- Built dynamic UI features and components with React.js and TypeScript on Informatica MDM.next.
- Created and optimized REST APIs with Java and Spring Boot, improving overall system performance and efficiency.
- Resolved 100+ JIRA issues (bug fixes and user stories) and swiftly cleared critical P0 blockers to ensure timely releases.
- Introduced bulk record enrichment in CAI workflows during file imports using BPEL expertise; integrated microservices with cross-functional teams.
- Conducted unit, end-to-end, and automation testing; managed builds and version control via Jenkins, Bitbucket, and JIRA; led Spring Boot knowledge-transfer and onboarding.

SKILLS

Languages: Java, TypeScript, JavaScript, Python, C++, C, SQL

Frontend: React.js, HTML, CSS, Bootstrap

Backend & Data: Spring Boot, REST APIs, Microservices, BFF Layers, MySQL, RDBMS

AI-Assisted Engineering: Cursor AI, Anthropic Claude, Prompt Engineering

Testing & Quality: Unit, E2E, Automation, Shift-Left Quality, CI/CD

Tools: Git, GitHub, Bitbucket, Jenkins, JIRA, VS Code, IntelliJ, Postman

Foundations: Data Structures & Algorithms, OOP, System Design, Problem Solving

EDUCATION

Lovely Professional University, Punjab, India — B.Tech, Computer Science & Engineering 2019 – 2023 | CGPA 8.51/10
