

Qazi Maaz Arshad

Software Engineer — Full-stack & AI-first

Bengaluru, India · qazimaazarshad@gmail.com · linkedin.com/in/qazimaazarshad · github.com/QAZIMAAZARSHAD · qazimaazarshad.github.io

SUMMARY

Software Engineer with **4+ years** building enterprise-scale products across the full stack. At Salesforce (R&D MDM), I work **AI-first** — orchestrating coding agents to plan, build, test, and review in parallel — pairing deep ownership of backend, BFF, and UI with a relentless focus on correctness, maintainability, and zero-regression releases.

EXPERIENCE

Salesforce — R&D MDM

Aug 2022 – Present · Bengaluru, India

Associate Member of Technical Staff

Grew through Software Development Intern → R&D Apprentice → Associate Software Engineer → Software Engineer → AMTS (Informatica, acquired by Salesforce).

- Own and deliver critical **epics and refactors end-to-end** across REST APIs, configuration & metadata flows, BFF layers, and complex UI workflows — using **Java, Spring Boot, React & TypeScript** in a large, multi-service codebase.
- Work **AI-first**: orchestrate coding agents (Cursor, Anthropic Claude) as a team — decomposing work, running agents in parallel, and delegating well-scoped tasks while steering architecture and review to ship large, complex work faster.
- Harden every change with automated **unit, end-to-end, and visual regression tests** generated alongside the code, driving shift-left quality and zero-regression releases.
- Recognized as the **go-to for cross-layer debugging** and time-sensitive blockers — stepping in to unblock releases and ensure continuity across dependency and ownership gaps.
- Built and maintained UI features and components on **MDM.next** (React) and streamlined backend services (Java/Spring Boot), delivering features, fixes, and user stories across the full stack.
- Champion **correctness, maintainability, and release stability** in high-impact areas of the enterprise master-data-management platform.
- Improve developer velocity through **CI/CD pipelines**, reusable patterns, and automation; collaborate closely with PMs, architects, and cross-functional teams.
- Raise the engineering bar on **code review, testing, and AI-assisted workflows** — sharing patterns that help the team ship reliable, well-tested software at speed.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL, C++

Backend: Spring Boot, Microservices, REST APIs, BFF Layers, MySQL, DBMS

Frontend: React, HTML, CSS, Bootstrap

AI-Assisted Engineering: Cursor AI, Anthropic Claude, Prompt Engineering

Quality & Delivery: Shift-Left Quality, Test Automation, Unit & E2E Testing, CI/CD

Foundations: DSA, OOP, System Design, Problem Solving

Tools & Platforms: Git, GitHub, Bitbucket, Jira, Microsoft Azure

EDUCATION

B.Tech, Computer Science & Engineering — Lovely Professional University

2019 – 2023 · CGPA 8.51

Barrows Blue Bells School — Class XII: 83.8% (2018) · Class X: 86.33% (2016)
